

Fireball Patents

Protect Your Brilliant Inventions

- Our unique approach to IP law sets us apart. Through innovative thinking and close collaboration, we find cost-effective routes to patent protection, like national rights, utility models, patents in 'no translation' states, protecting ideas as trade secrets, and US-only filings.
- This pragmatic approach has earned us our reputation as creative problem solvers and trusted advisors to startups & SME's worldwide.
- We are virtual, so please email, DM or call for an informal (video) chat about your IP.
